

Truck crane loading and unloading own vehicle Target

group and admission requirements

The Basic Vehicle Loader Crane Loading and Unloading Course is designed for people who need to operate a vehicle loader crane for loading and unloading their own vehicle in a professional capacity and who have previous training or have some experience in operating a vehicle loader crane.

This training is in accordance with [Occupational Health and Safety Decree article 8](#)

The employer shall ensure that workers are provided with effective instruction on working conditions appropriate to their various tasks.

This training is applicable when loading and unloading the own vehicle or lifting with the crane with a maximum capacity of up to 10 ton-meters.

The driver of the truck-mounted crane with hoisting function with a load moment of 10 ton-meter and higher and or a maximum hook height of 20 meters or more must legally be in possession of the TCVT-W4-04 Certificate 'Driver of a Truck-mounted Crane with Hoisting Function'. [Working Conditions Regulations Article 7.6](#)

It is often very unclear whether one is talking about only loading and unloading one's own vehicle or about performing lifting operations. Therefore the advice on behalf of the insurance companies is to use the TCVT Certificate at all times when in doubt.

The attached legal text "[Loading and unloading or hoisting truck cranes](#)" explains this in more detail and gives you an insight into what the rules are regarding the truck crane and the corresponding operator certification.

Persons wishing to participate in the training must be 18 years of age or older and physically and mentally fit to operate the machine.

Global curriculum

Participants gain knowledge and skills related to working safely and responsibly with the truck crane, when used for loading and unloading the own vehicle.

In addition, they learn to safely and responsibly attach (unusual) loads according to TCVT standards, use of proper tools and assessing risks. Finally, one is taught how to perform properly communicate with clients.

- Occupational health and safety regulations
- Working safely with a truck-mounted crane
- Stability
