IPAF AWP Training Courses 1A - 1B - 3A - 3B - Special Target group and entry requirements.

The training is designed for anyone who operates an aerial work platform professionally.

A worker who does not know how to work safely with an AWP can pose a danger to himself and those around him.

From the Working Conditions Decree Article 7.18 and 7.18b, expertise is required for use on hoisting & lifting equipment for persons, such as the aerial work platform.

Self-propelled mobile work equipment is operated by employees with specific expertise to do so.

The Occupational Health and Safety Act stipulates that employers must ensure that their personnel are adequately trained. in addition, the requirements for knowledge and understanding when working with an aerial work platform are increasing.

The **IPAF** training program for the operation of aerial work platforms was developed in close cooperation with professionals from the aerial work platform industry and is the only one certified by the German TŰV on the basis of the minimum standard requirements as stated in the ISO standard 18878. receive a certificate and an aerial work platform license in the form of the well-known PAL Card.

IPAF certification are recognized by SSVV - SOG as equivalent , if one holds the IPAF certificate you are therefore automatically exempted from SSVV training.

IPAF has 5 categories:

1 A **Static Vertical:**

Vertically operating, single-person stamped boom lifts.

1 B **Static Tree:**

Self-propelled telescopic and articulated boom lifts equipped with outriggers, boom lifts on trailer, boom lifts on chassis, spider boom lifts with outriggers.

3 A **Mobile Vertical:**

Self-propelled scissor elevators and self-propelled one-person vertical elevators.

3 B **Mobile Tree:**

Self-propelled telescopic and articulated boom lifts.

Special:

For example, rail-mounted boom lifts.

The minimum age of the student is 18.

Trainees must not have impairments of vision, hearing functions and motor skills. The student is required to wear a helmet and safety shoes during the practical part of the training.

Certified fall protection devices are available at the training site , if you own a personal fall protection device it may be used during training provided it meets the inspection requirements.

Global curriculum

The purpose of the training is to familiarize people with the AWP so that they can control and operate it safely and masterfully in all conditions .

The candidates become aware of all the possible dangers that can arise in this process. It is also

necessary to learn how to apply fall protection correctly. Correct clear communication with all

those involved in the work.

The training is given by experienced and well-trained instructors who themselves have long working experience with the aerial work platform.We work with approved aerial work platforms , scissors , articulated telescope and if desired with the car aerial work platform.

Candidates are given a training folder at the beginning of the training. During the theory

part, the following topics are covered:

- General (basic concepts)
- Legislation (legal provisions)
- Safety (general safety rules, specific risks)
- Professional technique (preparation, operation)
- Knowledge about different aerial work platforms and their limitations
- Safety in the work area under the AWP

The practical instruction includes applying the safety requirements in practice:

- Commencement control of the AWP
- Initial inspection of fall protection and its use
- LMRA
- Practical hints on use
- Driving the aerial platform
- AWP assignment with Scissor elevator
- AWP assignment with Articulated telescope
- Perform various assignments

Maximum number of participants

This training is possible with a maximum of 8 participants per instructor
. (depending on the number of categories)

Resources

V-tas owns the necessary aerial work platforms and practice sites including all mandatory required fall protection devices .

Exam

There is an exam associated with the course.

The exam consists of a practical and a theoretical exam and is taken at the end of the training. If the exam is passed, the student will receive a

IPAF certificate and a PAL card (proficiency card).

The PAL Card (Powered Access License) is recognized in many global workplaces as proof that its holder has been trained at the highest level

Validity period of the certificate

The PAL Card is provided by the International Powered Access Federation (IPAF)

to trainees who have attended and successfully completed training at an approved IPAF training center.

The period of validity of the certificate is five (5) years.

Site and safety managers can apply the online PAL Card verification tool to verify that a PAL Card is genuine. Call the IPAF hotline if you have questions: +44 (0)15395 66700 or contact the nearest office in your country.

Recertification

The training and testing should be done again after 5 years.

General information

Duration of	trainingNo experience minimum 2 days, including the exam.
	Review or experienced 1 day including the exam.
Training	locationEvery V-bag location.
Number of	students1 to 8 at open enrollment at one of the V-TAS locations (depending on the number of categories)
Code 95	No
Start	dateYou can find this in our calendar on our website www.vtas.com or check with one of the V-TAS staff. You can reach us at +31 497 360305.

If no suitable date is planned, a suitable solution can always be found in consultation. Subsidy possibilitiesV-

TAS	is recognized by: SOOB - OOM - Colland - KMO-Portefeuille.
	ExemptionIPAF certification does not give exemption on SSVV certifications !
