VCA OR VCA VOL

Introduction

SCC stands for "Safety, Health and Environmental Checklist Contractors" and is designed to help you work more safely and reduce the number of accidents in the workplace. More and more clients are contracting their work only to VCA-certified suppliers.
Having an SCC is not a legal requirement.

There are 2 types of certification; the person certification and the company certification.
Person certification is an essential component in the training of the self-employed person.

Content and purpose of training

There are two courses within the SCC:

- VCA basic safety (VCA-basis)
- Safety for Operational Managers (VOL SCC).

If you are managerial or self-employed you must be VCA VOL (person) certified.

Exams

Attached to the training is a VCA infra exam.

The exam will be administered at the end of the training day.

If the exam is passed, the student will receive a certificate and a professional competence card and an entry in the VCA diploma register.

Validity period of the certificate

The period of validity of the certificate is ten (10) years.

Recertification

The training and exam must be redone after 10 years.

General information

Duration of	trainingVCA basic with E-learning + 1 day part
