

EXCEPTIONAL SKILLS DAY ®

Introduction

Exceptional transports or exceptional transport applies to loads that exceed the normal legally permitted dimensions and weights for a "normal " transport.

Within this sector, Nootboom Trailers b.v. is a leader in innovating and building appropriate, high-quality solutions for the transport of any kind of exceptional cargo.

Transporting special loads with our advanced equipment requires a certain degree of expertise and knowledge of the equipment, all the different regulations and, of course, a different driving style when participating in traffic.

The driver in open or exceptional transport must have great expertise and professional knowledge of the equipment, driving, loading and unloading and, of course, always pay extra attention to loading, bracing, anchoring and blocking the loads. He must also take into account all possible requirements of the manufacturers, machine owners, inspection services and, of course, the vehicle and the load.

To reiterate and or experience all facets of the profession in an effective and instructive way, there is the Nootboom EXCEPTIONAL SKILLS DAY ®.

Over a long day, various aspects of exceptional transport are covered and practiced in a group carousel format, the items can be customized to suit your company's needs.

Target group and admission requirements

- Drivers and persons working in exceptional and/or open transportation.
- Students must not have impairments of vision, hearing functions and motor skills.

Training content

The training consists of a short theory section after which practical assignments are carried out in groups.

Theory

During the theory section, topics covered include:

- Forces at play when transporting exceptional cargo
- Methods and principles of exceptional transport
- Explanation of the competition element

Practice

The practical part may consist, in varying composition, of :

- Maneuvering with exceptional vehicles including Euro low loader, Manoovr, Semie low loader or low loader trailer.
- Loading and unloading of mobile equipment , scissor lifts, telescopic boom lifts, telehandlers, crawler cranes, forklifts and or customer specific loads
- Load securing open vehicle
- Transportation guidance (introduction)
- Use of Nootboom equipment - explanation of technical capabilities of Nootboom equipment
- Factory visit (after completion of Code 95 times)

Result One will receive a certificate of participation for the day.
