

## MANOEUVRING

### Introduction

Most damages are caused when maneuvering. This training is entirely focused on optimizing the driving style when maneuvering and thus reducing damages and increasing safety. The training can be considered very effective due to a proper combination of theory and practice.

### Target group and admission requirements

All professional drivers holding at least a C or D driver's license

### Content and purpose of training

The training consists of a theoretical and a practical part.

There are 2 training variants maneuvering regular and cut up. Regular is with theory in the morning followed by practice.

Cut up with the theory through E-learning and then the remaining practice within 10 working days.

- Knowledge of maneuvering
- Controlling and maneuvering vehicles
- Looking , observing, concentrating and driving techniques
- Knowledge, attitude and driver behavior
- Reduction of damages
- Dealing with difficult situations

### Exams

A V-TAS exam is associated with the training.

The exam consists of a practical and a theoretical exam and is taken at the end of the training day. If the exam is passed, the trainee receives a certificate and a professional competence card which are valid for 5 years.

V-TAS is convinced that, with our new E-learning program, we have developed something unique that is the solution for many people for additional training of the practical hours Code 95.
