Working safely along the road according to CROW 96B

Target group and entry requirements.

While working along and near (public) roads, it is indispensable to take the proper safety measures. This applies not only to employees who place or remove barriers based on instructions from the foreman/operator and/or a drawing, but also to those who must perform the work along the road.

Road builders, Emergency Services, drivers, service mechanics , employees of landscaping companies, pavers, and anyone else who has to deal with working on the road.

Content and purpose of training

The course participant gains insight into the liability, dangers and problems associated with road works and road closures. He thus meets the requirements of the Occupational Health and Safety Act and learns about the practical guidelines in accordance with CROW 96B.

The training includes a theory section in which the following aspects are covered in detail:

- Working safely along the road
- Safety regulations
- Barriers and signs

In addition, topics covered include:

- Installing and removing deposits
- Safety regarding work on/along the road
- Safety clothing
- The use of Personal Protective Equipment(PPE).
- Materials
- Road operators and road types
- Dealing with road users
- Responsibility and liability

Maximum number of participants

A maximum of 16 participants per instructor is possible for this course.

Resources

V-bag owns the necessary practice materials.

Review

A test is attached to the training. This test consists of theory and a practical part.

If the exam is passed, the student will receive a working conditions certificate and a professional competence pass.

Validity period of the certificate

The validity period of the certificate is five (5) years.

Recertification

The training and testing should be done again after 5 years.
